

MOHAMMED TAREEQ ADNAAN

Frontend Developer

Hyderabad, India | 9515812273 | adnaandev21@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Frontend Developer with **2+ years** of experience building **enterprise-grade retail SaaS platforms** using React JS, Next JS, and TypeScript. Built back-office administration systems (POS, inventory, loyalty, analytics) powering **600+ retail stores** across multiple regions. Expertise in **large-scale state management (Redux Toolkit, 160+ slices)**, enterprise data grids (AG Grid Enterprise), **role-based access control**, multi-tenant architecture, and AI-powered analytics. Delivered multi-language (RTL/LTR) interfaces with **15+ business modules** in a collaborative cross-functional environment.

CORE TECHNICAL SKILLS

- **Languages & Frameworks:** JavaScript, TypeScript, React JS, Next JS, HTML, CSS
- **State Management:** Redux, Context API
- **UI & Styling:** Tailwind CSS, Material UI, Untitled UI, Responsive Design
- **Tools & Platforms:** Git, GitHub, GitLab, REST API Integration
- **Backend (Familiar):** Node.js, NestJS, PostgreSQL, SQL, Microservices Architecture

PROFESSIONAL EXPERIENCE

Revest Solutions

June 2024 – Present

Frontend Developer

Revest Solutions Private Limited is a **B2B SaaS company** headquartered in Saudi Arabia, building a **unified retail technology platform** that digitalizes and streamlines end-to-end retail operations. The company operates across multiple regions including KSA and Egypt, serving 600+ retail stores.

Job Responsibilities:

- Develop and maintain **35+ pages and 40+ feature modules** of the enterprise retail back-office platform using React JS, Next JS, and TypeScript, managing application state across 160+ Redux Toolkit slices.
- Build complex, data-intensive interfaces using **AG Grid and MUI X Data Grid Pro** for modules including sales management, inventory, purchase orders, and custom reports.
- Implement and maintain **REST API integrations** via a centralized Axios interceptor layer that handles multi-tenant context injection (companyId, tenantId, legalEntityId), JWT authorization and unified toast-based error handling.
- Collaborate with backend, mobile, QA, and product teams across KSA and Egypt in an agile workflow, maintaining code quality with GitHub Actions CI/CD pipelines across **7 deployment environments**.

Key Contributions:

- Led the **Design System v2 revamp using Untitled UI**, React Aria headless components, and Tailwind CSS 4 with design tokens, migrating interfaces from MUI v5 to accessible, consistent, and reusable components that standardized the UI across modules.
- Developed the **Workflow Automation system** end-to-end including Workflow Templates with conditional logic builder, Workflow Approval Tasks with task assignment and approval chains, and Workflow Approval Committee streamlining business process approvals across the platform.
- Developed the Legal Entity management module for **multi-entity organizational setup** and the Marketplace pricing module for marketplace-specific price list configurations.
- Built the **Sales Overview Dashboard** using AG Charts Enterprise, Recharts, and Cube.js, featuring configurable date range filters, multi-store and multi-legal-entity selectors, and **region-based filtering** to visualize key metrics including total sales, transaction count, and average order value.

PERSONAL PROJECTS

Innowave / [View Project](#)

- Developed a comprehensive engineering project learning and exploration platform with **responsive UI and scalable front-end architecture**.
- Designed **dynamic multi-category filtering** based on academic levels (Mini/Major) and domains including IT, CSE, ECE, and EEE for streamlined project discovery.
- Built custom workflows, dynamic project cards, and mentorship **booking integration**.

Rebsort / [View Project](#)

- Developed a **premium digital marketing agency landing page** focused on lead generation, responsive design, and conversion-driven user experience.
- Built dynamic **full-funnel growth strategy** sections, interactive multi-step process flows, and client testimonial components to improve user engagement.
- Implemented **responsive pricing tiers and secure checkout** workflows optimized to convert first-time visitors into potential business leads.

EDUCATION

- **Bachelor of Information Technology** — Osmania University, Hyderabad 2022
- **Diploma in Electrical and Electronics Engineering** — Govt. Polytechnic Kotagiri, Nizamabad 2019

CERTIFICATION AND ACTIVITIES

- **ReactJS Certification** – Naresh i Technologies / [View Certificate](#)
- **Technical Blogging** – Authored a blog on "**Mastering ReactJS**" / [View Blog](#)
- **Generative AI & ChatGPT Prompt Engineering** – Ongoing course focused on writing effective prompts for optimal responses.
